Ridgewood Water is hosting a series of Community Open Houses in Midland Park, Wyckoff, Ridgewood and Glen Rock.

Customers and interested members of the community are invited to attend any of the scheduled events to learn more about Ridgewood Water's regular maintenance, system upgrades, and compliance with new and evolving regulations for drinking water, including Per- and Polyfluoroalkyl Substances (PFAS). PFAS are man-made chemicals that are found to be widespread and extremely persistent in the environment.

Ridgewood Water's professional staff and technical experts will be on hand to provide information and answer questions about what the utility is doing to provide customers with reliable, quality drinking water.

All Ridgewood Water customers should have received in the mail a Public Notification Supplement with important information about your drinking water, as a supplement to the 2018 Water Quality Report mailed in July. If you have not yet received this mailer, you can access a copy at
